- **1kg ENSIGN** clover blend
- **14kgs** Grass Seed per bag
- **BARENBRUG** advisors for specialist on-farm advice
- McLarnon Sales Advisory team for **SERVICE** and **ADVICE**

McLarnon Feeds Grass Seed Mixtures 2011

PERMA-SWARD

Perma-Sward is a superior multi-purpose grass mixture. The seeds within this mixture are suited to normal soil conditions. This mixture is suitable for grazing & cutting with greater emphasis on grazing.

SUPER-SWARD

Super-Sward produces an excellent long term ley in normal conditions. It is suitable for both cutting & grazing with the emphasis on cutting. This mixture has similar heading dates to maximise high yields of high digestibility silage.

MAXI-SWARD

Maxi-Sward is an exceptional long term grass mixture. It is suited to heavier soils and Timothy has been included. This mixture is suitable for grazing & cutting with more emphasis on grazing.

TETRA-GRAZE

Tetra-Graze is a specialist long term grazing mixture. It contains only late varieties that results in exceptional high yielding palatable swards which are very persistent.

PERENNIAL RYEGRASS

Variety	Heading Date	Grazing Yield	1 ST Cut Silage Yield	Silage	Sward Density	Maturity Class
				D-Value		
DUNLUCE	28th May	109	94	115	5.6	Intermediate (TET)
DELPHIN	31st May	106	121	116	5.0	Late (TET)
TYRELLA	2nd June	99	113	96	6.3	Late
FOXTROT	3rd June	103	103	104	6.3	Late
NAVAN	3rd June	104	107	109	5.4	Late (TET)
PASTOUR	4th June	102	107	110	6.1	Late
DUNLOY	7th June	102	100	111	6.0	Late (TET)

WHITE CLOVER

Variety	Leaf Size	Clover Yield Potential	Grazing Persistency	
			Low N	High N
ALICE	118	113	5.1	4.2
BARBLANCA	122	119	5.6	4.6
CRUSADER	84	99	5.8	4.9
